                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 E coli transposon insertion: The present data does not contain E. ocioi transposon sequences which integrated in the crighinal/pervious sequences. We determined the boundary between the insertion and genomic sequence experimentally, removed the insertions sequences, reconstituted the present data. The sequencing project is supported by Japan Science Technology Corporation (JST) and The Institute of Physical and Chemical Research (RIKEN).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    72251
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          72311
                                                                                                                                                                                                                                                                                                                                                                                     Agricolar inhily. NOTE Estimated insert size may differ from sequence length (see http://www.hgsc.bom.tmc.edu/docs/Genbank_draft_data.html). NOTE: This is a "working draft' sequence. It currently consists of 6 contigs. The true order of the pisces is not known and their order in this sequence record is
                                                                                                                                                                                                                                                                                                                                                                                                                         arbitrary. Gaps between the contigs are represented as runs of N, but the exact sizes of the gaps are unknown. This record will be updated with the finished sequence as soon as it is available and the accession number will be preserved.
Sequencing vector; plasmid; Sequencing vector; plasmid; Chemistry: Dye-terminator Big Dye: 100% of reads Assembly program: Phrap: version 0.990329 Consensus quality: 110567 bases at least 040 Consensus quality: 111963 bases at least 030 Consensus quality: 111803 bases at least 020 Consensus quality: 11803 bases at least 020
